

## Project Part 2 - CSCI 4488

**Team:** Yu Zhou, Christina Matteis, Daniel Nolan, Jacob C. Levine

**Title:** Share-It!

### Project Summary:

A share economy website where members list their personal knowledge/skills/resources that they'd be willing to share or trade. Then, if a user needs something they can browse the site for other users with that particular skill or resource. Such as someone that has the tools and/or know-how to help you tune your snowboard. The site would include location information so that you could find someone near you.

### Project Requirements:

Business Requirements				
ID	Requirement	Topic Area	User	Priority
No business requirements				

User Requirements				
ID	Requirement	Topic Area	User	Priority
USR-001	New user can create a new account	Account setup	All users	Critical
USR-002	Existing user can save personal skills/resources	User profile	All users	High
USR-003	Existing user can search for someone with desired skill/resource	Searches	All users	Critical
USR-004	Existing user can search by zip code to find skill/resource	Searches	All users	Medium
USR-005	A System Administrator can unlock a locked account for a user.	Security	Sys Admin	High
USR-006	A user can request to have their account deleted	User account	All users	Low

USR-007	A user can submit support ticket	Customer service	All users	Medium
USR-008	A Sys. Admin must delete a user account if requested	Account deletion	Sys Admin	High
USR-009	A user can reset their password automatically through the “Forgot Password” link	Password reset	All users	High
USR-010	A user can message another user after finding that they have a certain skill/resource	Inter-user messaging	All users	High
USR-011	A user can login into the system.	Login	All users	High

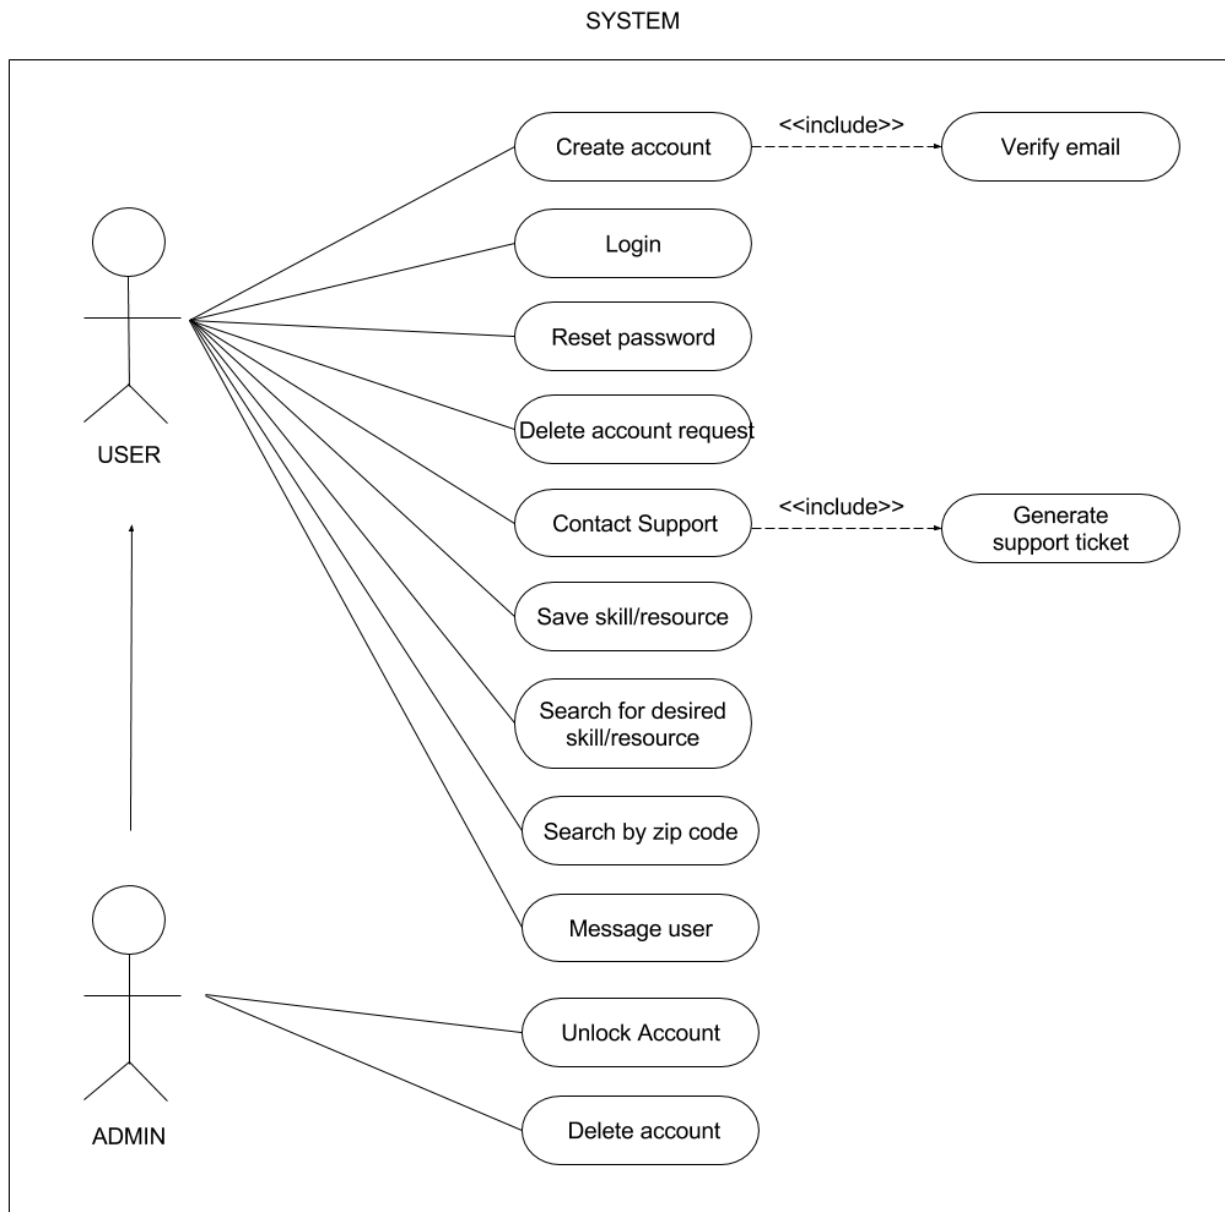

Functional Requirements				
ID	Requirement	Topic Area	User	Priority
FUNC-001	User info must be deleted if a user requests it	Data deletion	All Users	Medium

Non-Functional Requirements				
ID	Requirement	Topic Area	User	Priority
NONF-001	User’s accounts are password-protected for security reasons	Security	All users	Medium
NONF-002	User’s email address is verified as valid	Security	All users	Low

#### Use Cases:

**Actors:** Admin, Customers

### Use Case Overview:

### Use Case Documents:

<b>Use Case ID:</b>	USR-001
<b>Use Case Name:</b>	Create Account
<b>Description:</b>	A new user can create an account with an email address
<b>Actors:</b>	User

<b>Pre-Conditions:</b>	1. User does not have an existing account 2. User has active email address										
<b>Post-Conditions:</b>	User has a personal account for web use										
<b>Frequency of Use:</b>	Once										
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User clicks “Create Account” button on homepage</td><td>Displays form for email address and password</td></tr> <tr> <td>2</td><td>User inputs email address, password, and accepts geolocation access then clicks “Submit” button.</td><td>System saves information to database and confirmation email is sent. Success prompt is shown.</td></tr> </tbody> </table>			Actor Action	System Response	1	User clicks “Create Account” button on homepage	Displays form for email address and password	2	User inputs email address, password, and accepts geolocation access then clicks “Submit” button.	System saves information to database and confirmation email is sent. Success prompt is shown.
	Actor Action	System Response									
1	User clicks “Create Account” button on homepage	Displays form for email address and password									
2	User inputs email address, password, and accepts geolocation access then clicks “Submit” button.	System saves information to database and confirmation email is sent. Success prompt is shown.									
<b>Variations:</b>	2. If email is already in use, system will prompt user to either use another email or login.										
<b>Notes and Issues:</b>											
<b>Developer Notes:</b>											

<b>Use Case ID:</b>	USR-002				
<b>Use Case Name:</b>	Save a skill or resource				
<b>Description:</b>	Existing user can save a personal skills or resource that is to be made available to other users for sharing.				
<b>Actors:</b>	User				
<b>Pre-Conditions:</b>	User has an active account and is logged in				
<b>Post-Conditions:</b>	New skill/resource is saved in database				
<b>Frequency of Use:</b>	Moderate				
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> </tbody> </table>			Actor Action	System Response
	Actor Action	System Response			

	1	Click “Save New Skill/Resource”	Displays list of skills/resources for user to pick from
		User selects applicable skills/resources and presses “Save”	System prompts for user to “Save Choices?” or Cancel
	2	User clicks save	System saves new skill/resource in database
<b>Variations:</b>	2. If user attempts to click save without picking at least one skill/resource, system prompts user to pick and resubmit.		
<b>Notes and Issues:</b>	User must pick at least one skill/resource to save		
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	USR-003										
<b>Use Case Name:</b>	Skill/resource search										
<b>Description:</b>	Existing user can search for someone with desired skill/resource										
<b>Actors:</b>	User										
<b>Pre-Conditions:</b>	User has an active account and is logged in										
<b>Post-Conditions:</b>	Matching results (if any) are displayed										
<b>Frequency of Use:</b>	High										
<b>Flow of Events:</b>	<table> <tr> <td></td><td>Actor Action</td><td>System Response</td></tr> <tr> <td>1</td><td>User clicks on “Search” button</td><td>Displays form for entering search criteria</td></tr> <tr> <td>2</td><td>User fills in search form and clicks submit</td><td>Displays list of any matching results</td></tr> </table>			Actor Action	System Response	1	User clicks on “Search” button	Displays form for entering search criteria	2	User fills in search form and clicks submit	Displays list of any matching results
	Actor Action	System Response									
1	User clicks on “Search” button	Displays form for entering search criteria									
2	User fills in search form and clicks submit	Displays list of any matching results									

<b>Variations:</b>	2. If form is missing any required fields, system prompts user to fill in those fields and resubmit.
<b>Notes and Issues:</b>	
<b>Developer Notes:</b>	

<b>Use Case ID:</b>	USR-004										
<b>Use Case Name:</b>	Skill/resource search by zip code										
<b>Description:</b>	Existing user can search by zip code to find someone with a specific skill/resource in their area.										
<b>Actors:</b>	User										
<b>Pre-Conditions:</b>	User has an active account and is logged in										
<b>Post-Conditions:</b>	Matching results (if any) are displayed										
<b>Frequency of Use:</b>	High										
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User clicks on “Search” button</td><td>Displays form for entering search criteria</td></tr> <tr> <td>2</td><td>User fills in search form and clicks submit</td><td>Displays list of any matching results</td></tr> </tbody> </table>			Actor Action	System Response	1	User clicks on “Search” button	Displays form for entering search criteria	2	User fills in search form and clicks submit	Displays list of any matching results
	Actor Action	System Response									
1	User clicks on “Search” button	Displays form for entering search criteria									
2	User fills in search form and clicks submit	Displays list of any matching results									
<b>Variations:</b>	2. If form is missing any required fields, system prompts user to fill in those fields and resubmit.										
<b>Notes and Issues:</b>											
<b>Developer Notes:</b>											

<b>Use Case ID:</b>	USR-005
<b>Use Case Name:</b>	Unlock User Account
<b>Description:</b>	A System Administrator can unlock a locked account for a user

<b>Actors:</b>	User, Sys Admin																			
<b>Pre-Conditions:</b>	User has an active, locked account and Sys Admin is logged in																			
<b>Post-Conditions:</b>	User is able to login to their account using new temp password																			
<b>Frequency of Use:</b>	Moderate																			
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User calls customer service and requests a to have their account unlocked</td><td></td></tr> <tr> <td>3</td><td>Sys Admin clicks “Manage a user’s account”</td><td>Displays form for entering a user’s username</td></tr> <tr> <td>4</td><td>Sys Admin enters the relevant username and clicks submit</td><td>Displays admin page for managing a specific user’s account</td></tr> <tr> <td>5</td><td>Sys Admin verifies user’s identity by having them confirm account info on file</td><td></td></tr> <tr> <td>6</td><td>Sys Admin clicks “Unlock User Account”</td><td>User’s account is unlocked</td></tr> </tbody> </table>			Actor Action	System Response	1	User calls customer service and requests a to have their account unlocked		3	Sys Admin clicks “Manage a user’s account”	Displays form for entering a user’s username	4	Sys Admin enters the relevant username and clicks submit	Displays admin page for managing a specific user’s account	5	Sys Admin verifies user’s identity by having them confirm account info on file		6	Sys Admin clicks “Unlock User Account”	User’s account is unlocked
	Actor Action	System Response																		
1	User calls customer service and requests a to have their account unlocked																			
3	Sys Admin clicks “Manage a user’s account”	Displays form for entering a user’s username																		
4	Sys Admin enters the relevant username and clicks submit	Displays admin page for managing a specific user’s account																		
5	Sys Admin verifies user’s identity by having them confirm account info on file																			
6	Sys Admin clicks “Unlock User Account”	User’s account is unlocked																		
<b>Variations:</b>	6. If the user was unable to provide info that verifies their identity, the Sys Admin apologizes that they cannot help the user at this time and does not unlock the account.																			
<b>Notes and Issues:</b>																				
<b>Developer Notes:</b>																				

<b>Use Case ID:</b>	USR-006
<b>Use Case Name:</b>	Delete Account Request
<b>Description:</b>	An existing user can request to delete their account
<b>Actors:</b>	User

<b>Pre-Conditions:</b>	User has an existing account													
<b>Post-Conditions:</b>	Account will be marked for deletion													
<b>Frequency of Use:</b>	Once													
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User clicks on “Manage Account”</td><td>Display user account settings</td></tr> <tr> <td>2</td><td>User clicks on “Request to Delete Account”</td><td>System prompts for confirmation</td></tr> <tr> <td>3</td><td>User confirms by clicking “OK”</td><td>System marks user’s account for removal in database</td></tr> </tbody> </table>			Actor Action	System Response	1	User clicks on “Manage Account”	Display user account settings	2	User clicks on “Request to Delete Account”	System prompts for confirmation	3	User confirms by clicking “OK”	System marks user’s account for removal in database
	Actor Action	System Response												
1	User clicks on “Manage Account”	Display user account settings												
2	User clicks on “Request to Delete Account”	System prompts for confirmation												
3	User confirms by clicking “OK”	System marks user’s account for removal in database												
<b>Variations:</b>														
<b>Notes and Issues:</b>														
<b>Developer Notes:</b>														

<b>Use Case ID:</b>	USR-007							
<b>Use Case Name:</b>	Submit Support Ticket							
<b>Description:</b>	An existing user can write and submit a support ticket							
<b>Actors:</b>	User							
<b>Pre-Conditions:</b>	User has an existing account							
<b>Post-Conditions:</b>	User ticket has been submitted							
<b>Frequency of Use:</b>	Low							
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User clicks on “Create a Ticket”</td><td>Display text box to</td></tr> </tbody> </table>			Actor Action	System Response	1	User clicks on “Create a Ticket”	Display text box to
	Actor Action	System Response						
1	User clicks on “Create a Ticket”	Display text box to						

			write a ticket
	2	User creates a ticket message	Text is displayed within the given textbox
	3	User submits a written ticket	A “Submission Successful” message displays
<b>Variations:</b>	3. If a ticket is missing any required fields, system prompts user to fill in those fields before submission.		
<b>Notes and Issues:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	USR-008										
<b>Use Case Name:</b>	Delete Account										
<b>Description:</b>	If deletion was requested by user, a system administrator will delete the account.										
<b>Actors:</b>	Admin										
<b>Pre-Conditions:</b>	User has requested to delete their account										
<b>Post-Conditions:</b>	User will no longer have an account										
<b>Frequency of Use:</b>	Once										
<b>Flow of Events:</b>	<table> <tr> <td></td><td>Actor Action</td><td>System Response</td></tr> <tr> <td>1</td><td>System Admin clicks “Requests for account removal”</td><td>Displays table of users requesting to delete accounts</td></tr> <tr> <td>2</td><td>Sys Admin clicks on specific user name</td><td>Displays admin page for managing a user’s account</td></tr> </table>			Actor Action	System Response	1	System Admin clicks “Requests for account removal”	Displays table of users requesting to delete accounts	2	Sys Admin clicks on specific user name	Displays admin page for managing a user’s account
	Actor Action	System Response									
1	System Admin clicks “Requests for account removal”	Displays table of users requesting to delete accounts									
2	Sys Admin clicks on specific user name	Displays admin page for managing a user’s account									

	<table><tr><td></td><td>Sys Admin clicks “Permanently Delete Account”</td><td>System deletes all database tables associated with user account</td></tr></table>		Sys Admin clicks “Permanently Delete Account”	System deletes all database tables associated with user account
	Sys Admin clicks “Permanently Delete Account”	System deletes all database tables associated with user account		
<b>Variations:</b>				
<b>Notes and Issues:</b>				
<b>Developer Notes:</b>				

<b>Use Case ID:</b>	USR-009																
<b>Use Case Name:</b>	Click “Password Reset” Link																
<b>Description:</b>	A user can click “Forgot Password,” which generates a clickable link that resets a previous password																
<b>Actors:</b>	User																
<b>Pre-Conditions:</b>	User has an existing account																
<b>Post-Conditions:</b>	User password has been reset																
<b>Frequency of Use:</b>	One to many																
<b>Flow of Events:</b>	<table> <tr> <td></td><td>Actor Action</td><td>System Response</td></tr> <tr> <td>1</td><td>User clicks “Forgot Password” button</td><td>System displays form for entering user’s email address.</td></tr> <tr> <td>2</td><td>User enters their email address and clicks submit</td><td>System sends a link to user allowing for password reset</td></tr> <tr> <td>3</td><td>User clicks “Password Reset” link in the email</td><td>Set of fields display allowing a user to change their password</td></tr> <tr> <td>4</td><td>User submits new password</td><td>System displays verification that the password has changed</td></tr> </table>			Actor Action	System Response	1	User clicks “Forgot Password” button	System displays form for entering user’s email address.	2	User enters their email address and clicks submit	System sends a link to user allowing for password reset	3	User clicks “Password Reset” link in the email	Set of fields display allowing a user to change their password	4	User submits new password	System displays verification that the password has changed
	Actor Action	System Response															
1	User clicks “Forgot Password” button	System displays form for entering user’s email address.															
2	User enters their email address and clicks submit	System sends a link to user allowing for password reset															
3	User clicks “Password Reset” link in the email	Set of fields display allowing a user to change their password															
4	User submits new password	System displays verification that the password has changed															

<b>Variations:</b>	<p>3. If a user submits a previously used password, disable submission button and throw an error since it must be a new password.</p> <p>3. If the password field is empty, send a verification message stating that the field is empty and must be filled in.</p>
<b>Notes and Issues:</b>	
<b>Developer Notes:</b>	

<b>Use Case ID:</b>	USR-010													
<b>Use Case Name:</b>	User Messaging													
<b>Description:</b>	A user can message another user after finding that they have a certain skill / resource													
<b>Actors:</b>	Users													
<b>Pre-Conditions:</b>	Users have existing accounts, user must have submitted skills/resources													
<b>Post-Conditions:</b>	User receives a message from another user													
<b>Frequency of Use:</b>	High													
<b>Flow of Events:</b>	<table> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> <tr> <td>1</td><td>User 1 searches for another user with a certain skill they are interested in</td><td>System displays all possible users that match the user's search</td></tr> <tr> <td>2</td><td>User 1 clicks on User 2 who has a chosen resource / skill</td><td>User 2 information and message link is displayed</td></tr> <tr> <td>3</td><td>User 1 messages User 2</td><td>User 2 receives a message from User 1 and both are CC'd onto an email / message board</td></tr> </table>			Actor Action	System Response	1	User 1 searches for another user with a certain skill they are interested in	System displays all possible users that match the user's search	2	User 1 clicks on User 2 who has a chosen resource / skill	User 2 information and message link is displayed	3	User 1 messages User 2	User 2 receives a message from User 1 and both are CC'd onto an email / message board
	Actor Action	System Response												
1	User 1 searches for another user with a certain skill they are interested in	System displays all possible users that match the user's search												
2	User 1 clicks on User 2 who has a chosen resource / skill	User 2 information and message link is displayed												
3	User 1 messages User 2	User 2 receives a message from User 1 and both are CC'd onto an email / message board												

<b>Variations:</b>	
<b>Notes and Issues:</b>	
<b>Developer Notes:</b>	

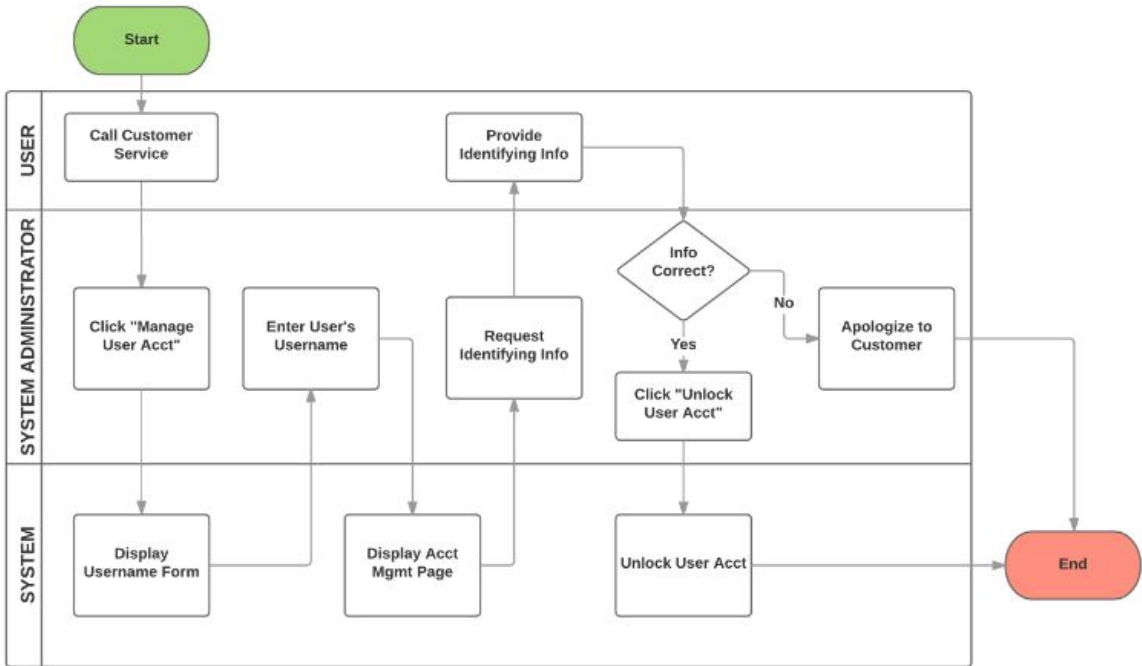

<b>Use Case ID:</b>	USR-011										
<b>Use Case Name:</b>	User Login										
<b>Description:</b>	A user can login into the system										
<b>Actors:</b>	User										
<b>Pre-Conditions:</b>	User has an existing account										
<b>Post-Conditions:</b>	User has logged into their account										
<b>Frequency of Use:</b>	High										
<b>Flow of Events:</b>	<table border="1"> <thead> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> </thead> <tbody> <tr> <td>1</td><td>User inputs username and password into designated fields</td><td></td></tr> <tr> <td>2</td><td>User clicks “Login” button</td><td>System logs user into their account</td></tr> </tbody> </table>			Actor Action	System Response	1	User inputs username and password into designated fields		2	User clicks “Login” button	System logs user into their account
	Actor Action	System Response									
1	User inputs username and password into designated fields										
2	User clicks “Login” button	System logs user into their account									
<b>Variations:</b>	2. If User submits incorrect values in login fields, system will prompt user to try logging in again.										
<b>Notes and Issues:</b>											
<b>Developer Notes:</b>											

#### Activity Diagrams:

1.

# UNLOCK USER ACCOUNT

Requirement ID#: USR-005  
Use Case ID#: USR-005  
By: Jacob C. Levine  
Description: A Sys Admin  
unlocks an account for a user

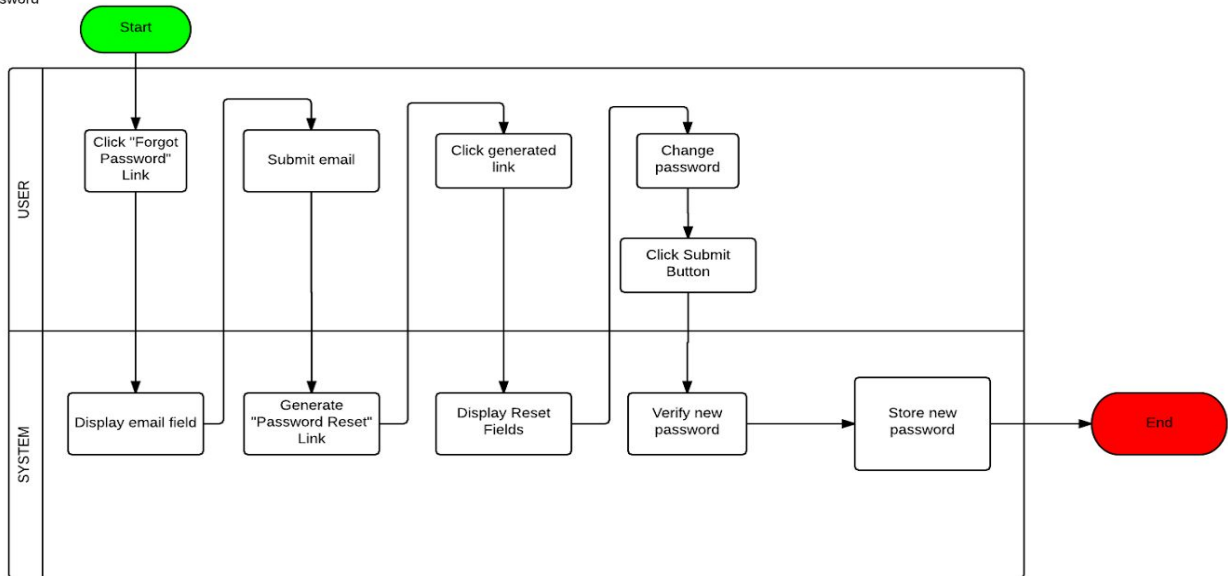

### CLICK "PASSWORD RESET" LINK

Requirement ID #: USR-009

Use Case ID #: USR-009

By: Daniel Nolan

Description: A user can click "Forgot Password," which generates a clickable link that resets a previous password

3.

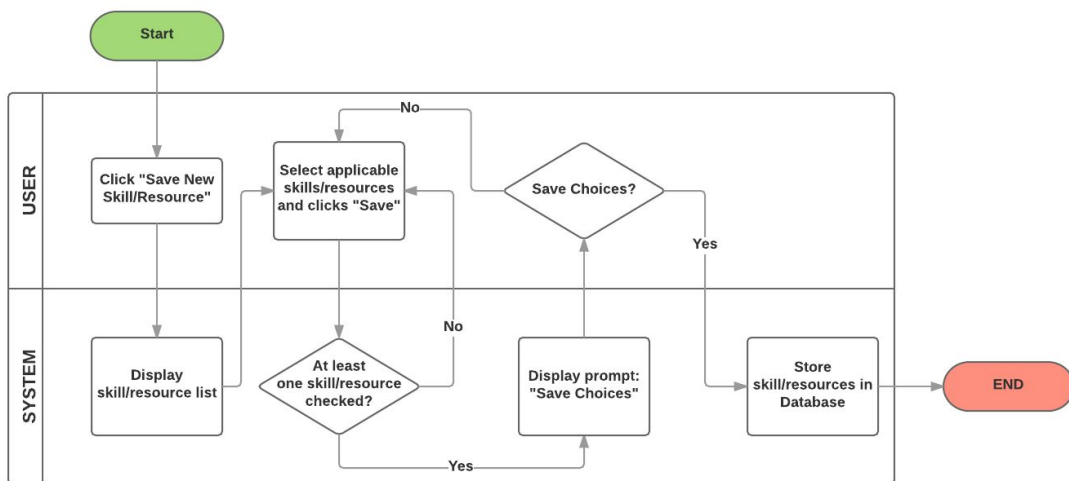

### SAVE NEW SKILL/RESOURCE

Requirement ID#: USR-002

Use Case ID#: USR-002

By: Christina Matteis

Description: An existing user can save a personal skills or resource that is to be made available to other users for sharing.

4.

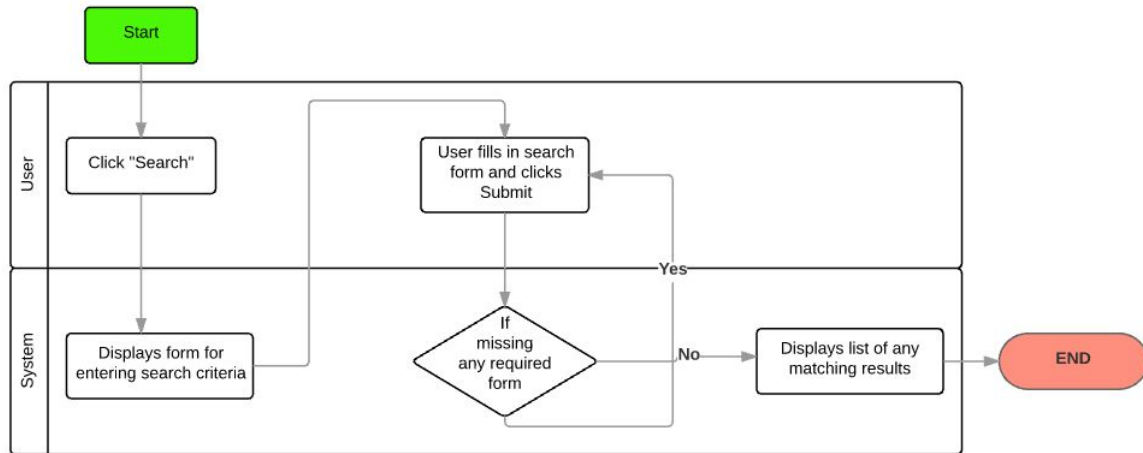

**Skill/resource search by zip code**

Requirement ID#: USR-004

Use Case ID#:USR-004

By Yu Zhou

Description: Existing user can search by zip code to find someone with a specific skill/resource in their area.

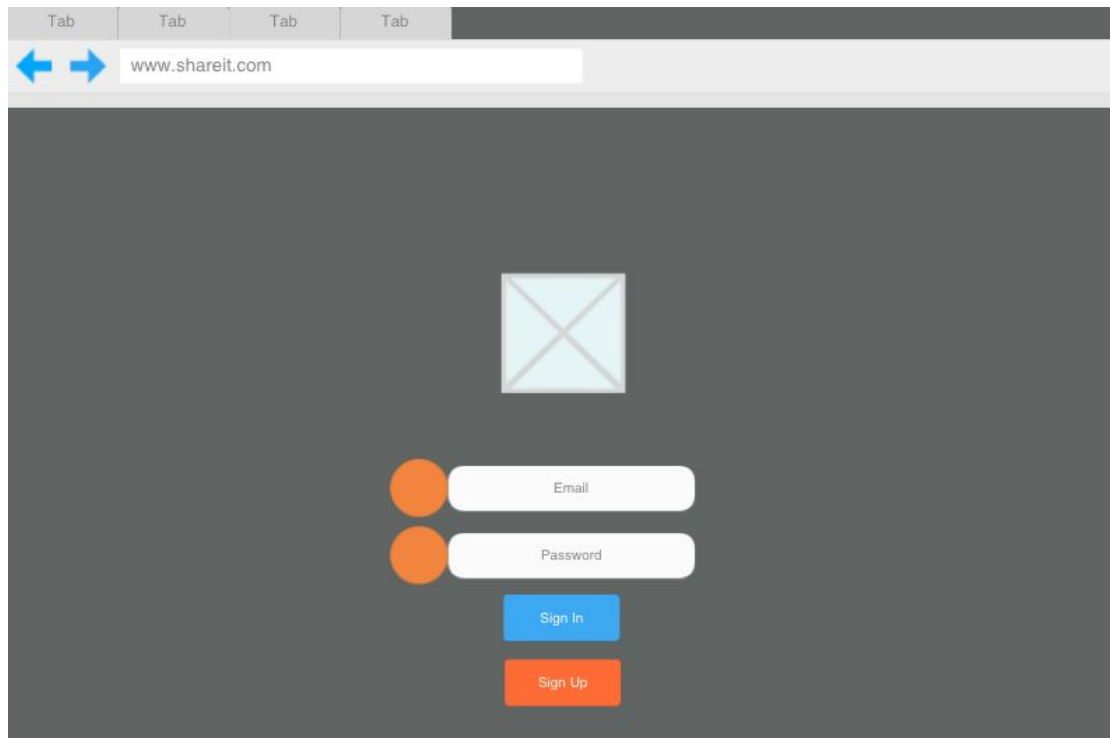

**Data Storage:**

- MySQL database
- Classes:
  - DBmanager class to store all needed information such as user info (including System Administrators) and messages
  - All other classes go through the DBmanager class

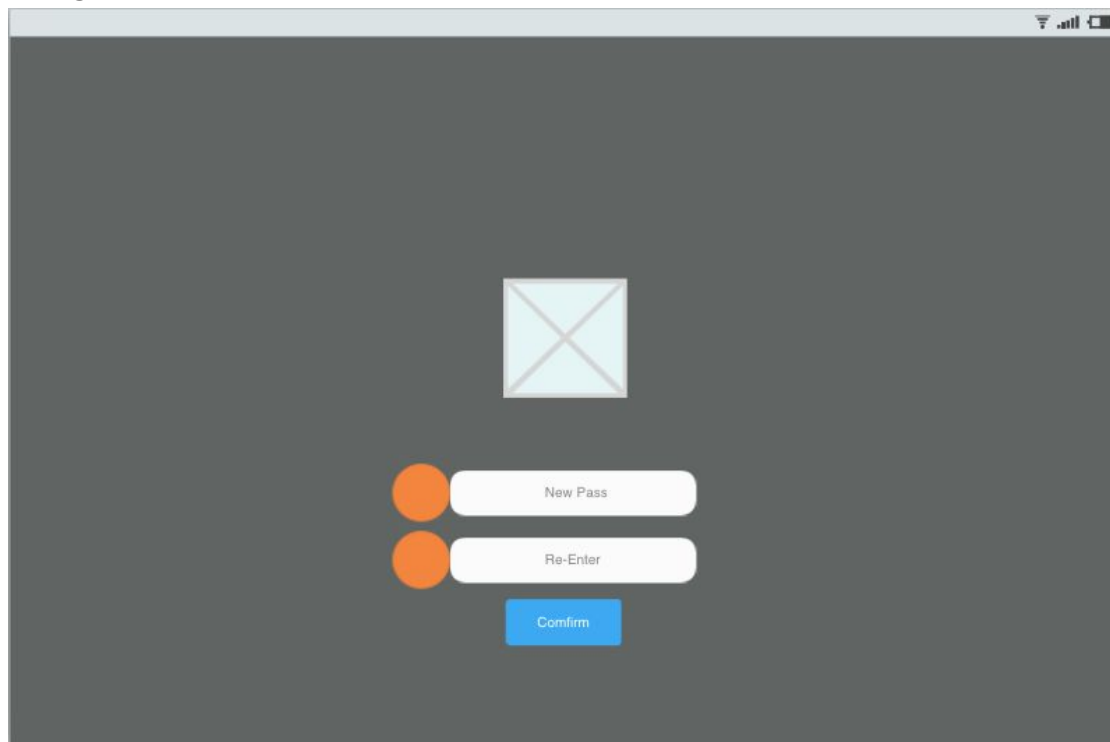

## UI Mockups:

### Log In

A UI mockup for a login page. At the top, there is a browser header with four tabs labeled 'Tab' and a search bar containing 'www.shareit.com'. Below the header is a large dark gray rectangular area. In the center of this area is a light blue square with a white 'X' inside. Below this square are two white input fields, each preceded by an orange circle. The first input field is labeled 'Email' and the second is labeled 'Password'. Below these fields are two buttons: a blue 'Sign In' button and an orange 'Sign Up' button.

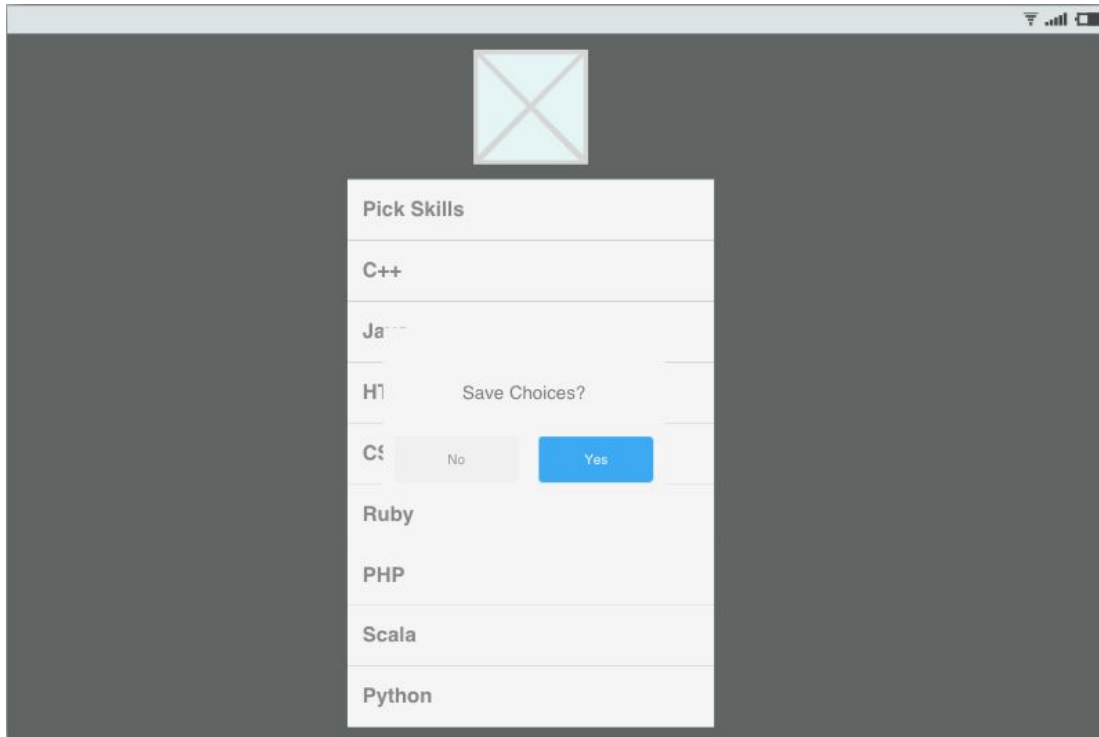

### Change Password

A UI mockup for a change password page. At the top, there is a light gray header bar with a signal strength icon, a battery icon, and a full-screen icon on the right. Below the header is a large dark gray rectangular area. In the center of this area is a light blue square with a white 'X' inside. Below this square are two white input fields, each preceded by an orange circle. The first input field is labeled 'New Pass' and the second is labeled 'Re-Enter'. Below these fields is a blue 'Confirm' button.

## Save Skills

A mobile app interface with a dark gray background. At the top center is a light blue square with a white 'X' inside. Below it is a white modal dialog box titled "Pick Skills". The dialog contains a list of programming languages: C++, Java, HTML, CSS, Ruby, PHP, Scala, and Python. To the right of the list is a "Save Choices?" label. Below the list are two buttons: a gray "No" button and a blue "Yes" button. The top of the app shows a status bar with signal, Wi-Fi, and battery icons.

Pick Skills

C++

Java

HTML

CSS

Ruby

PHP

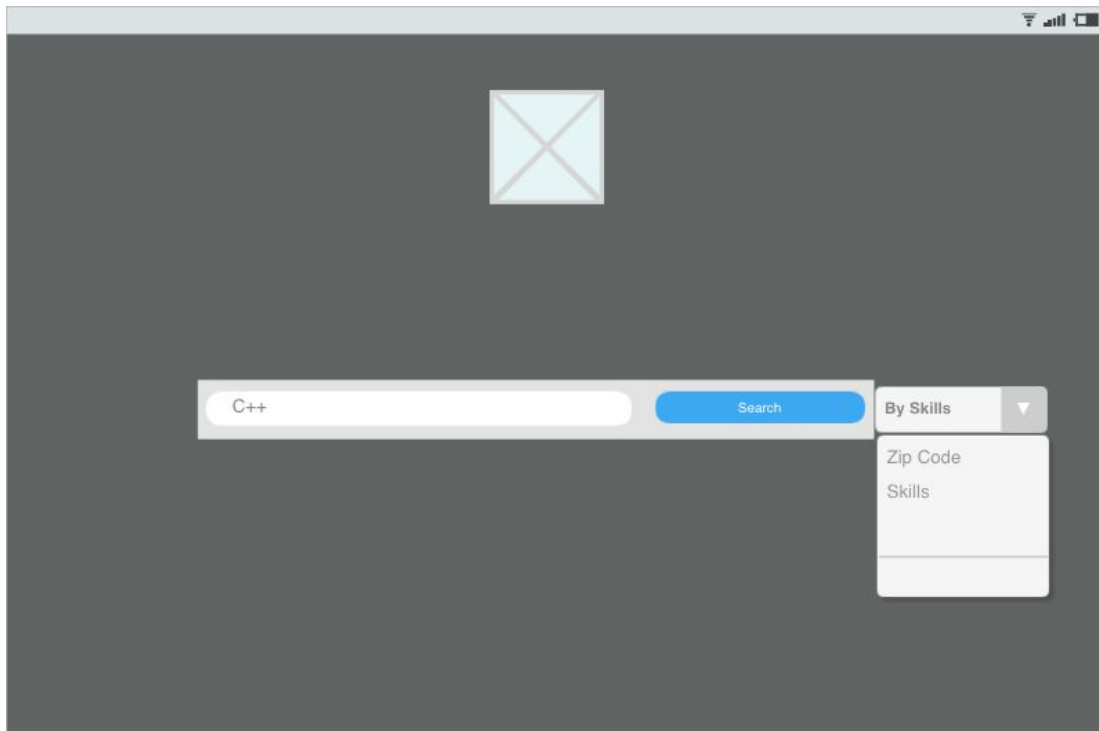

Scala

Python

Save Choices?

No Yes

## Search Skills/Zip Code

A mobile app interface with a dark gray background. At the top center is a light blue square with a white 'X' inside. Below it is a white search bar containing the text "C++". To the right of the search bar is a blue "Search" button. To the right of the search bar is a dropdown menu labeled "By Skills" with a downward arrow. The dropdown menu is open, showing two options: "Zip Code" and "Skills". The top of the app shows a status bar with signal, Wi-Fi, and battery icons.

C++

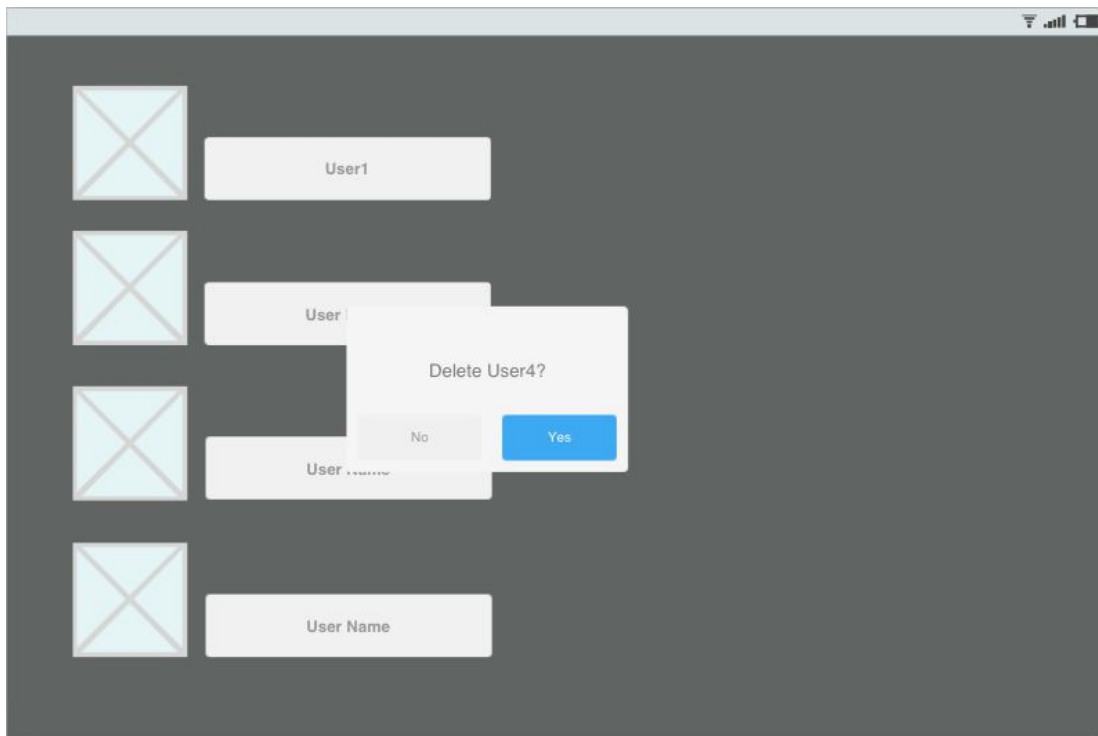

Search

By Skills

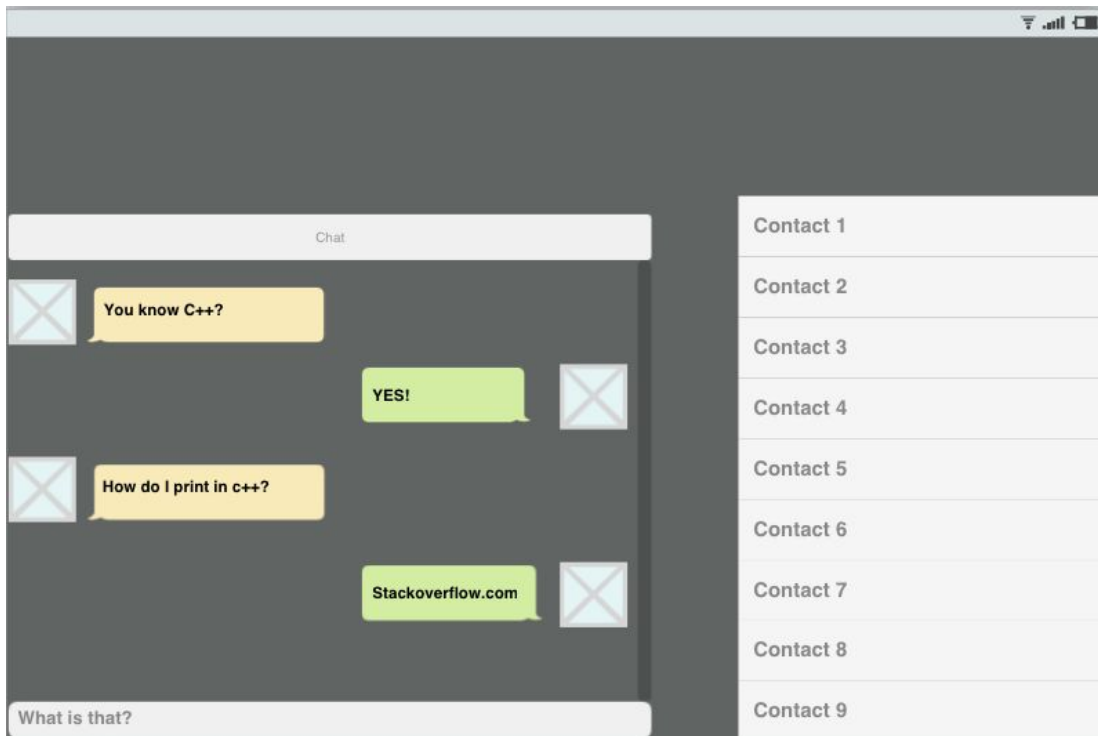

Zip Code

Skills

## Delete Users

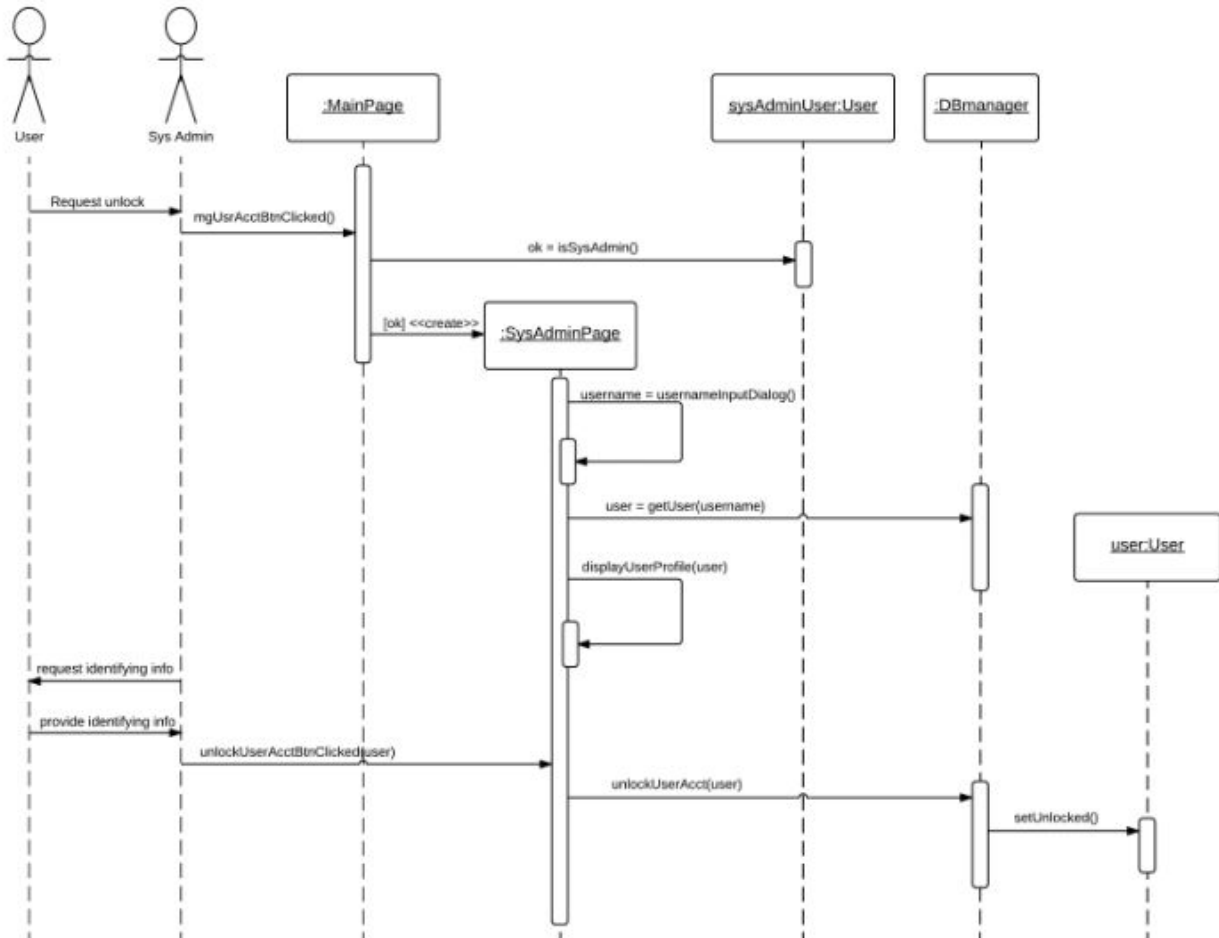

## Chat System

## User Interactions:

### UNLOCK USER ACCOUNT

Requirement ID#: USR-005  
Use Case ID#: USR-005  
By: Jacob C. Levine  
Description: A Sys Admin  
unlocks an account for a user

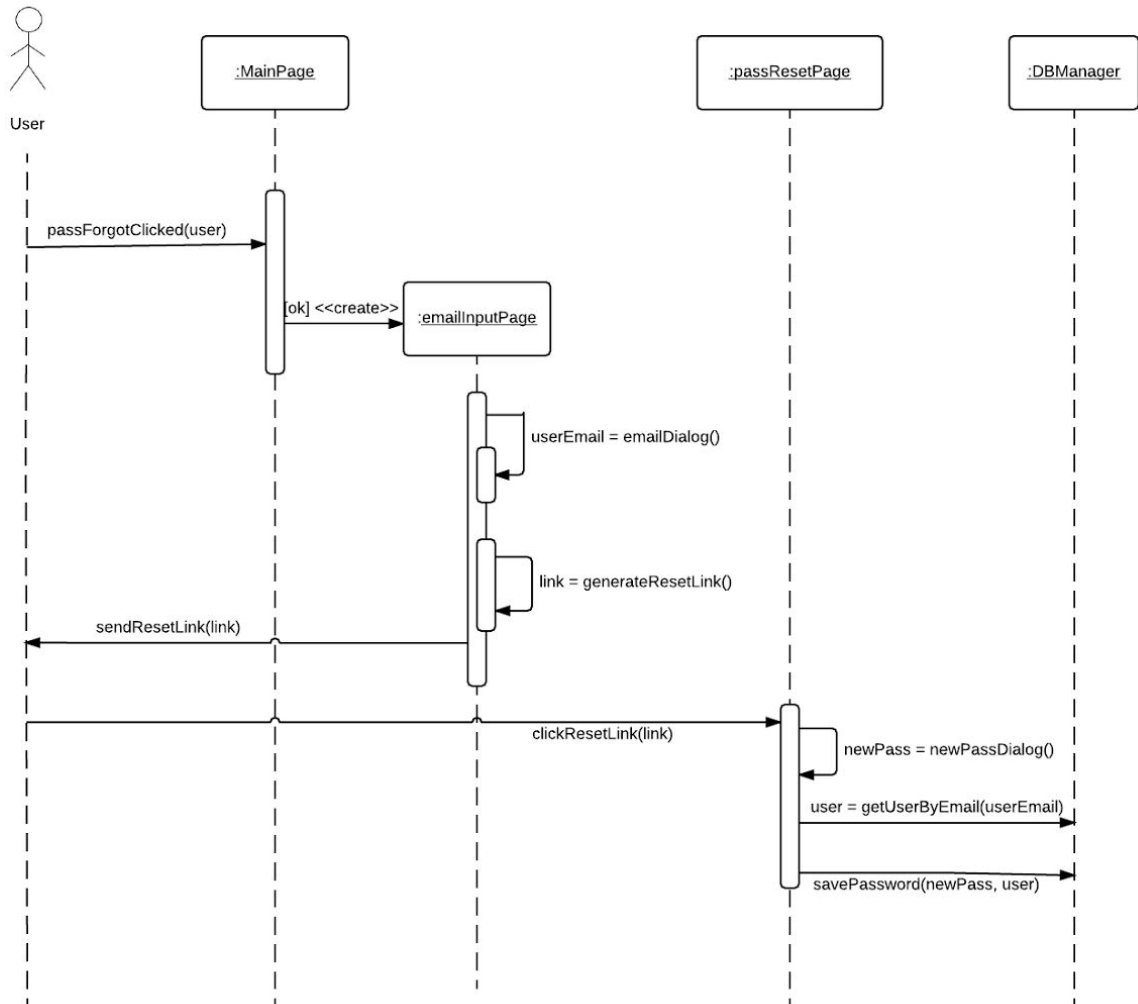

### CLICK "PASSWORD RESET" LINK

Requirement ID #: USR-009

Use Case ID #: USR-009

By: Daniel Nolan

Description: A user can click "Forgot Password," which generates a clickable link that resets a previous password

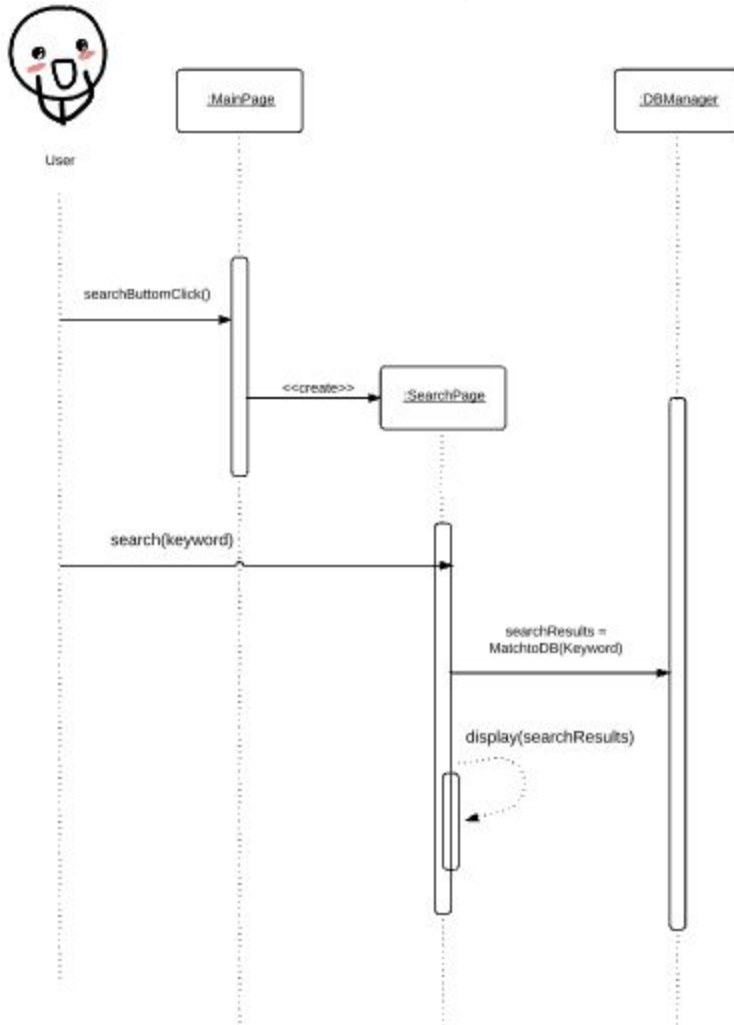

Skill/resource search by zip code

Requirement ID#: USR-004

Use Case ID#: USR-004

By Yu Zhou

Description: Existing user can search by zip code to find someone with a specific skill/resource in their area.

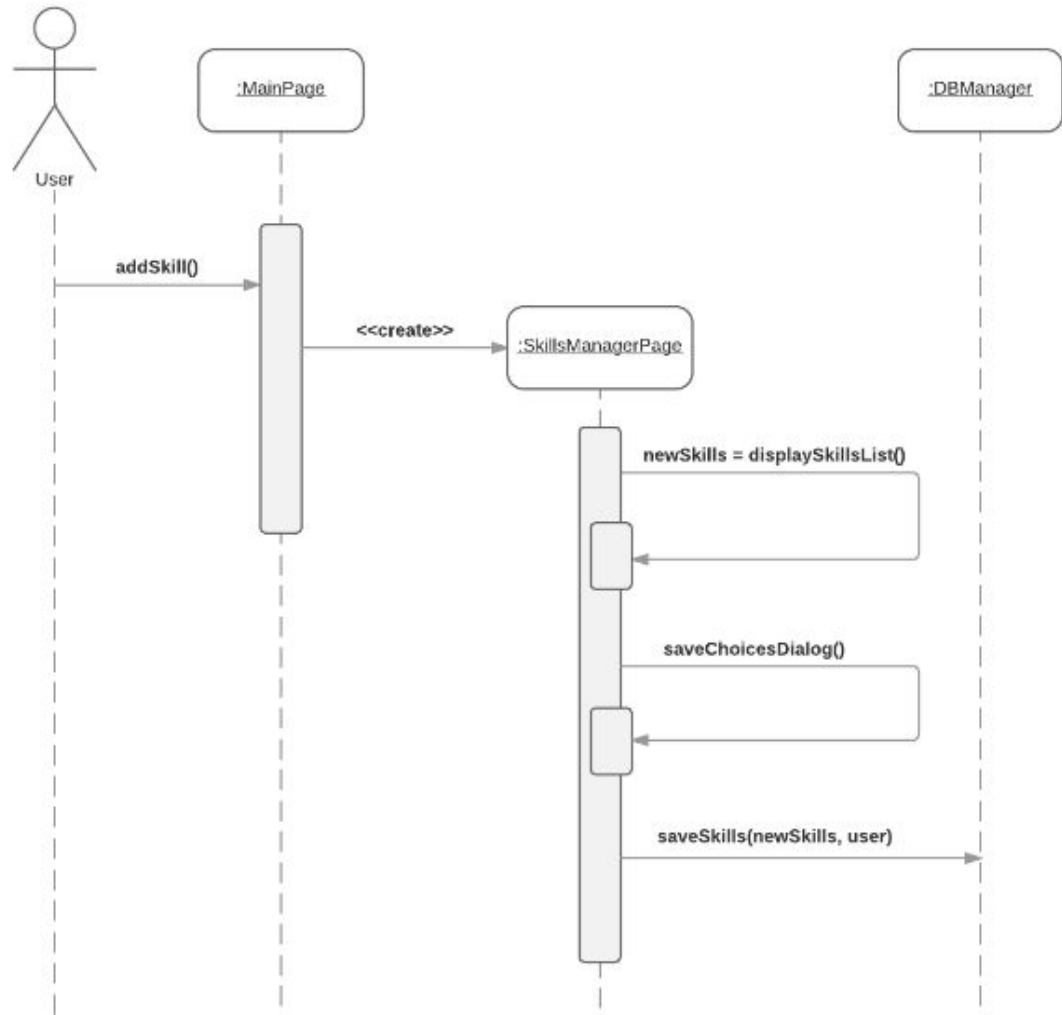

## SAVE NEW SKILL/RESOURCE

Requirement ID#: USR-002

Use Case ID#: USR-002

By: Christina Matteis

Description: An existing user can save a personal skills or resource that is to be made available to other users for sharing.
